TOWN WARRANT

STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Newport qualified
to Vote in Town Affairs:—

You are hereby notified to meet at the Town Hall
in said Town of Newport, on the second Tuesday of
March next, at nine o'clock in the forenoon, to act
upon the following subjects:

Article 1. To bring in your ballots upon each of
the questions submitted by the Convention to Revise
the Constitution relative to the amendments proposed
by said Convention at a session held on January 28,
1921.

Article 2. To elect three Selectmen, one for three
years, one for two years and one for one year.
To elect a Town Treasurer and a Town Clerk for the
ensuing year.

Article 3. To elect a member of the Trust Fund
Commission for a term of three years, one Water and
Sewer Commissioner for a term of three years, one
Cemetery Commissioner for a term of three years,
a Collector of Taxes, Road Agents, and all other Of-
ficers and Agents necessary for the town business.

Article 4. To hear the reports of the Selectmen,
Town Treasurer, Auditors and other Officers hereto-
fore chosen and pass any vote relating thereto.

Article 5. To raise and appropriate such sums
of money as may be necessary for the payment of
town charges, including town officers' salaries and ex-

penses, election and registration expenses, expenses of the municipal court and maintenance of the town hall.

Article 6. To see if the town will instruct the selectmen to appoint a police force in Newport, designate the hours of service, and to see what sum of money the town will raise and appropriate for the support of the fire department, and to see if the town will vote to co-operate with the State Forestry Department and raise \$200, a like amount being contributed by the department for the control and extermination of the white pine blister in the town.

Article 7. To see if the town will vote to raise \$200 for State Aid Maintenance, a like amount being contributed by the State Highway Department for the maintenance of the State Aid road.

Article 8. To see if the town will vote to raise \$8,000, a like amount being contributed by the State Highway Department, for the maintenance of the trunk line roads.

Article 9. To raise and appropriate such sums of money as may be necessary for the building and repair of highways and bridges.

Article 10. To see what sum of money the town will vote to raise and appropriate for lighting the streets of Newport, and pass any vote relating thereto.

Article 11. To see if the town will vote to raise and appropriate the sum of \$150 to defray the expenses of Memorial Day, and pay the same to the Quartermaster of Fred Smyth Post, No. 10, G. A. R.

Article 12. To see what sum of money the town will vote to raise and appropriate for parks and playgrounds, including a payment of \$325 to the Treasurer

of the Newport Cadet Band, providing the band gives a series of open air concerts during the summer season.

Article 13. To see if the town will vote to put in a suitable water main from North Main street to the residence of Herbert Truell on Wilmarth flat, and pass any vote relating thereto.

Article 14. To see what action the town will take with reference to extending the water mains or pipes of the town water system along Oak, Union and Pine streets or any of them, raise and appropriate money therefor and pass any vote relating thereto.

Article 15. To see what sum of money the town will raise and appropriate for the maintenance of the sewer system for the ensuing year.

Article 16. To see what action the town will take in regard to the public scales and pass any vote relating thereto.

Article 17. To see if the town will vote to authorize the selectmen and town treasurer to borrow money on the notes of the town in anticipation of taxes.

Article 18. To see if the town will allow a discount on taxes paid prior to June 15 and September 1st, fix the amount of such discount, and pass any vote relating thereto.

Article 19. To see if the town will appropriate the sum of three hundred dollars to aid in the support of the district nurse.

Article 20. To raise and appropriate such sums of money as may be necessary for the payment of the town debt, and the interest thereon for the year ensuing and pass any vote relating thereto.

Article 21. To see if the town will raise and

appropriate the sum of \$93,000 for payment of bonds and obligations outstanding against the town, and due the current year of 1921, and to borrow the said sum of \$93,000 and issue obligations of the town in the form of bonds to the amount of \$93,000, to be signed by the selectmen and town treasurer, under the terms and conditions of a special act of the Legislature of 1919. Approved March 17, 1919.

Article 22. To see what sum of money the town will vote to raise and appropriate for the construction and repair of sidewalks and pass any vote relating thereto.

Article 23. To see if the town will vote to raise \$5,000 for sewer construction, and issue serial notes of the town, under provisions of the statutes, for the extension of the Maple Street sewer to Broadview Heights.

Article 24. To see if the town will vote to ask for State aid in connection with its appropriation for permanent improvements.

Article 25. To see if the town will vote to instruct the Selectmen to take from the road agents' districts the unimproved section of the Claremont road, accept the provisions of Chap. 117, Laws of 1917, raise \$250 for the purpose and turn the road over to the State Highway Department for repairs for the ensuing year.

Article 26. To see what provision the town will make for the rebuilding or repair of the dry bridge, so-called on the intervale road west of Elm Street.

Article 27. To see if the town will vote to construct a drain on Pleasant Street to remove the water which accumulates and forms a pond at certain sea-

sons on land on the southerly side of said street, west of the homestead of F. P. Rowell, under provisions of Sections 4 and 5 of Chap. 79 of the public statutes.

Article 28. To see if the town will vote to purchase a tractor of the caterpillar type for use on the highways of the town.

Article 29. To see if the town will make an appropriation for the observance of Old Home Week, which opens on Saturday, August 20, and pass any vote relating thereto.

Article 30. To see if the town will accept the streets as laid out on plan of Pine Crest, said plan having been duly recorded in Sullivan County Registry of Deeds, and also to see if the towns will vote to extend the water system to the house now built on Whitney Avenue.

Article 31. To see if the town will raise and appropriate the sum of five hundred dollars additional for Parks and Playgrounds.

Article 32. To see if the town will vote to discontinue and abandon the road from the Reed schoolhouse to the easterly side of the South Branch of the Sugar River near Pollard's Mill, thereby doing away with the maintenance of the bridge at this place.

Article 33. To see if the town will vote to discontinue and abandon the Whicher road, so called, from the Claremont road to the road leading from the Reed schoolhouse to the place occupied by Herbert Cutts.

Article 34. To transact any other business that may legally come before said meeting.

Gilman Pond

The water has been above the average for the year. August 7th it was at its lowest point, then only three inches below high water mark or seventeen inches below the highest point reached.

The water commissioners have purchased the Bartlett land, so-called, of about fourteen acres also the Paul land of about the same amount at a cost of \$2,500 This completes the circuit around the pond except a small strip owned by John Niemi.

Water is Supplied as Follows:

Faucets for family use,	900
Bath tubs,	389
Water closets,	863
Sill cocks,	412
Stores,	36
Hotels,	1
Printing offices,	2
Livery stables,	2

Overseer of Poor.

AUDITORS' REPORT

We, the undersigned, auditors of the Town of Newport, hereby certify that we have completed an examination of the books and accounts of the Selectmen, Town Treasurer, Town Clerk, Water Commissioners, Sewer Commissioners, Cemetery Commissioners, Trustee of Trust Funds, and Municipal Court and find them correctly cast and properly vouched.

GEORGE E. LEWIS,
ROBERT T. MARTIN,
HERVEY D. ANGELL,

Auditors.

February 19, 1921.

BOARD OF HEALTH REPORT

To the Selectmen of Newport :

Your Health Officer submits the following report: During the first part of the past year the town was remarkably free from the diseases of a communicable nature and our attention was particularly taken up with the inspection of reported nuisances, examination of the milk supply, and also the water supply, the latter of which was found to contain micro-organism of an oily nature which the state chemist declared was the result of excessive vegetable matter being washed into the pond from the surrounding water-shed. In relation to this matter of water supply the recommendation of the Water Commissioners should receive the approval and support of the town, this is, the purchasing of the remainder of the land surrounding Gilman pond so that their plan of clearing up the entire shore land may be carried out.

During the last five months there was an outbreak of scarlet fever there being fifteen cases in all. The local physicians and health nurse co-operated with us in watching not only those who were known to have the disease but also those of whom they had any suspicion.

There were three cases of diphtheria. The houses in which they were, being fumigated at the termination of the sickness, as were also the three houses in which there had been deaths from tuberculosis.

It is very much to be regretted that the sewer extension, voted at town meeting a year ago, has not yet been put in. The Water Works Commissioners inform us that it was absolutely impossible to get the

pipe used in this work on account of the demoralization in the freight transportation system of the country last summer. There is no doubt that the coming spring will see this much needed improvement to our town undertaken and completed.

The prevention of disease is now the one big endeavor of all health centers, as the fact is undeniable that the care of detail and the prompt consideration of immediate local conditions will often prevent incipient epidemics from becoming widespread and dangerous. The State Board of Health in their latest bulletin puts forward the recommendation that we must not rely too confidently on disinfectants, etc., to protect us from infection, but in avoiding the personal contact with those having suspicious symptoms. We might instance, the avoiding of those who have ear and nose discharges and especially to avoid the sneezes of others. We have eliminated to a great extent the worst carriers of bacteria, which are the common drinking cup and the use of towels in public places.

Watchfulness in the apparent minor details of personal habits is our best safeguard.

The State Board is constantly enlarging its field work in betterment of local conditions in different localities and the State Inspector has been a great help to the local officer in correcting and remedying unsanitary conditions in our town. The State Inspector has made a number of recommendations as to the control and elimination of nuisances and a set of town rules are being drawn up, which, with the approval of the selectmen, it is hoped will make our town cleaner and a better place to live in.

Your health officer has written and given his heartiest approval of the movement of the N. H. Tubercular Society in their endeavor to have passed a law that will insure to the people of our state, milk that is

free from tubercular germs. Other states have the advantage of us in this respect as they have laws that protect them from milk of tubercular cattle. Some of our larger cities have local laws that require the milk sold to be pasteurized and have appropriate adequate funds to have a milk inspector constantly at work protecting the milk supply.

It is to be hoped that the present legislature will not adjourn without passing a law that all milk sold to the public should be from tubercular tested cattle. It has been proved that at least five per cent. of the tubercular people have bovine tuberculosis. The babies who cannot speak for themselves certainly deserve it from us to speak for them in this matter.

We should all urge our representatives in the present legislature to use their influence and activities to have passed such a law as will insure us pure milk. Such a law should be so framed as to prevent our state from becoming the dumping ground for the tubercular cattle of the surrounding states.

Respectfully submitted,

JOHN R. KELLY,

Health Officer.

SCHOOL SUPERINTENDENT'S REPORT

To the School Board of Newport:

I hereby submit my fifth annual report of the schools of Newport for your consideration and approval.

We are just getting well adjusted to our new district. We are getting a little acquainted with a few of the parents in Goshen and Unity and they are becoming more interested in school matters.

The district as a whole is a pleasant district to work in.

TEACHERS

We have been fortunate again to retain most of our efficient teachers this year, and to procure other efficient teachers to take the places of those who left us.

A superintendent of schools is entirely dependent upon his teachers for his success. He cannot put anything across except through his teachers. If they fail to carry out his suggestions and ideas he is helpless. Most of our teachers are very helpful and try their best to do as requested.

The Kellyville school and the Northville school are steadily improving under Miss Gladys Hurlbutt and Miss Susie Benway respectively. Miss Ruby Ayers is doing good work in the Reed school and Miss Gertrude Call has made wonderful improvements in the Guild school. This school was in poor shape and there was a great opportunity for improvement and Miss Call is making the most of the opportunity.

The longer we are in the school work the more we are convinced that the teacher is by far the largest

factor in the success or failure of a school. No reasonable amount of money should stand in the way of retaining a successful teacher. The money paid for a poor teacher is worse than thrown away; and the younger the pupils are the greater the harm done. It takes an efficient teacher a long time to eradicate the bad habits formed by the children under an inefficient teacher.

Our corps of teachers, taken as a whole, is a hard working, conscientious, efficient body of teachers. Of course some are more efficient than others. We believe all, or nearly all, are trying hard to do their best. Successful teachers, like any other special class of workers, are born, not made.

TEXT BOOKS AND SUPPLIES

No radical changes have been made in text books. Several sets of new readers have been added, as more reading is being required, especially in the lower grades.

A new set of books in physiology and hygiene has been placed in the sixth grade.

The "Book of Knowledge," a set of reference books for the upper grades, has been placed in the seventh and eighth grades rooms. A few other reference books have been added to the reference shelves of the high school grades.

There has been a very marked advance in the price of books during the year. Books were among the last thing to advance in price but when they did advance it was with rapid and long strides. Not only have they advanced in price but they have depreciated in material and workmanship.

Supplies advanced in price much earlier than books. Teachers and pupils have tried hard to keep the expense of supplies as low as possible. Whenever

possible we have used scratch paper that has been given us by Messrs. Fred T. Pollard, John McCrillis, and Myron Tenney. This is paper that has been used on one side but has one clear side left, that may be used for rough work such as penmanship practice, and ciphering. Several dollars have thus been saved the district. If other business men have such paper to contribute we shall be pleased to call for it.

All books are stamped, numbered, covered, and a careful record kept of them. Pupils are required to use book bags if they take books from the schoolhouses. If the pupils wish to take books home through vacation they are requested to purchase them with the privilege of returning them any time and receiving their money back, minus whatever damage they may have done the books. Quite a little money has thus been saved the town as often the books are not returned but the money is in the treasury. This method also does away with having to chase up lent books.

IMPROVEMENTS MADE

The sixth grade numbered nearly seventy pupils at the beginning of the year. This was too large a number for one room to accommodate or for one teacher to teach. We had tried several schemes for housing this grade but when school opened in the fall nothing had been accomplished. It was finally decided to purchase a two-room portable schoolhouse and an order was placed at once for the same. The delay made it necessary to have one division of the sixth grade attend school forenoons, the other division attend afternoons. This plan was not ideal but worked very well. Many other towns are doing the same way. The portable building was ready to be occupied at the opening of the winter term. It is proving all that we anticipated and is comfortable in the coldest of weather. It is

heated with Smith System heaters and ventilators. The light is the best it is possible to have in a school room as it all comes from the left side of the pupil. We have succeeded in finding a translucent shade which admits the light but prevents the glare of the sun. These shades are in the Allen adjustable fixtures.

Hyloplate blackboards have been installed. These boards are next best to slate boards. There are two Kaustine chemical toilets for the girls. The boys use the toilets in the Richards building.

The Commercial department was so large that we were obliged to purchase four more typewriters and tables, and to transfer it into the former sixth grade room. Twenty-five new bookkeeping desks were also purchased and installed. All the commercial work is now done in this room thus adding to the efficiency of this department.

Desks have been installed in the former commercial room thus adding one more recitation room which was very much needed.

Shower baths with hot and cold water have been installed in the Richards' building. This has filled a long felt want and one that we have wished for ever since we have been with you.

Hot water has also been installed in the Domestic Arts kitchen. The water is heated for both the baths and the kitchen by a small heater which uses but a very small amount of fuel, even less than was formerly used to heat the water for the kitchen.

The Alumni hall has been modeled into a basket ball hall. This change has hurt it none as an assembly hall but has made it possible for the boys and girls to have a place to have interclass games. About one hundred and fifty boys and girls play here during a week under the supervision of a teacher. The pupils who bring their noon lunch have a suitable place for

healthy games and amusements. How much better this is than to have them running at large in the streets.

Electric lights have been installed in the Primary building. Teachers have asked for these lights several times each year that I have been here. I assure you that they and I appreciate the lights very much. They will add much to the efficiency of this building.

IMPROVEMENTS NEEDED

First of all we need, and need it very much and at the earliest possible date, more room for our grades. Much fault has been found during the year with the school rooms and facilities in the engine house and Citizens' hall. Some have even gone so far as to appeal to the State Board. It hardly seems fair for some of our leading citizens to do nothing towards providing suitable school buildings and then to complain about what they do provide. School buildings and equipment must come from the citizens and not from the superintendent or school board. I have tried to make it clear ever since I have been here that what we need most of all, is a grade building. Our high school building is crowded, not because of the high school pupils, but because of the grades that are in it. We need at once at least an eight-room grade building.

Your superintendent is embarrassed many times by parents complaining to him in public places about the poor school accommodations their children have. If he had his way about it there would be built at once a suitable grade building. Until the parents are willing to erect such a building they have no right to complain. We have canvassed the town thoroughly for rooms and have taken the best we could find and have made them as safe, sanitary, and comfortable as we

know how with the restricted privileges under which their owners rent them.

Your superintendent will gladly meet the citizens any time and place before them what he believes to be the best way to meet the housing problem of your school children.

Apparatus should be furnished for the school yards. Not expensive apparatus but home-made, useful apparatus. Boys and girls should be given a chance to play, and apparatus to play with, where they may be supervised by teachers. Much that is good and helpful is learned from games they play. Keep the children busy at good things and they will not learn the evil. We, who are with the children so much of the time, cannot help but notice how much higher their morals are when they are busy than when they are idle. Some of our schools have improved immeasurably under teachers who supervise their games at intermissions, thus keeping them busy with good things. The normal boy and girl must be busy at something.

Play apparatus in the school grounds could be used the entire year while apparatus in a special play ground would be used only a small part of the year.

At least two teachers should be employed all the year. These need not be the same two, but the teachers should be so engaged that some two of them would be on duty all the year. They should have charge of the play grounds and gymnasium which should be open all the year. We strive hard to teach the children good habits for thirty-seven or thirty-eight weeks a year and then turn them loose the other twelve to run the streets and to undo all that we have done for them. Many cities and large towns have seen the foolishness of such a course and are taking care of the children at least a part of the day the whole year.

Our Domestic Arts department must have at once

more room. The classes are too large for our present accommodations. Classes have to be divided into two and three divisions, thus demanding more teachers. The practical arts courses are growing larger each year. They are doing good work under our efficient teachers, Miss Hoitt and Mrs. Gove.

EXHIBITION

During the fall term an exhibition of the work from the manual training, domestic arts, and drawing courses and the home-school gardens was given in the Richards' building. This was the second exhibition of its kind given in our schools, the first one being given a year ago. The attendance by parents was very much larger this year. We plan to make this an annual affair. Parents are showing their interest in these lines of work, thus encouraging pupils and teachers.

HOME-SCHOOL GARDENS

Much interest was taken by the pupils in their gardens last summer and many good gardens were the result. How much better it is to have children interested and working in gardens than to have them running the streets. Their gardens must have added much to the menu of many a table. We hope to do even more with the gardens this year. Several children were unable to have gardens because they could not procure land. Isn't there some one who lives near the village who can give the use of land for such a worthy purpose?

EVENING SCHOOL

The evening school has been in session ever since the first of October. We number about twenty-five. They are very regular in attendance and take great interest in their work. Three teachers are employed,

viz: Misses Rose Bassett, Anna Carrigan and Gertrude Nealon. Miss Margaret Barry taught the first part of the year but when the factories closed our numbers were so small only three teachers were needed.

At Christmas time the teachers and pupils had a social evening enjoying games, music, presents and refreshments. All seemed to have an enjoyable time. Even the janitor and superintendent were included.

The evening sessions are from 7 o'clock to 8.30 o'clock Monday, Tuesday and Thursday evenings.

MEDICAL INSPECTION

Much good is being done by our nurse and physician who not only examine the pupils but follow up those cases that need it.

Like any good thing when it starts, health inspection has its opponents. A very few parents have objected to have their children examined. They seemed to think the nurse and physician would in some way injure or expose them. In order to thoroughly examine their lungs it is necessary to unbutton the upper part of their clothes. The children are in no way stripped of their clothing as some seem to fear. However, a note requesting that their child be excused from examination is all that is necessary.

By studying the reports of the nurse and physician one will see that there is need of such examination.

TRANSPORTATION

We are trying hard to keep the expense of transportation as low as possible. It is constantly being asked for by those who do not need it. The girls in the upper grades in Guild are being conveyed to the Richards building this winter; the boys are walking. The children from East Mountain are being transport-

ed to the village. One of Ira Fellows' girls is being conveyed one way to the village. Mrs. Goodwin is being paid to convey her girl one way to the Kellyville school. The pupils in the upper grades at North Newport and Kelleyville and one boy from Chandlers schools are brought in on the train at the expense of the town. Only one teacher is employed at each, North Newport and Guild.

We wish to call attention to the reports of Headmaster Wiggin, Supervisor of Home-School Gardens and Manual Training and the School Nurse.

In closing I want to thank all who have in any way contributed to the efficiency of our work and the improvement of our schools. The longer I remain with you the more I become attached to your town and the greater is my interest in its welfare and prosperity. It is a pleasure to work with you and to serve your town. My one great desire is to make your schools more efficient and to help develop your boys and girls into good, happy and prosperous citizens.

Respectfully submitted,

W. H. S. ELLINGWOOD

Superintendent of Schools.

HIGH SCHOOL REPORT

Mr. W. H. S. Ellingwood, Superintendent of Schools:

I herewith submit the annual report of the High School for the past year:

The attendance data for the past eight years is as follows:

Year ending June	Number registered	Per cent. attendance	No. tardinesses per pupil
1913	86	95.84	4.4
1914	94	94.6	3.7
1915	95	95.76	5.6
*1916	120	96.5	3.2
1917	105	96.12	4.0
1918	98	96.38	.9
1919	110	94.85	1.3
1920	103	96.62	.7
1921	123	97.38	.31

* Eighth and ninth grades both promoted to high school.

o Data is for first half of year.

At the end of the first half of this year we have in membership 94 per cent. of the pupils registered in the fall, at the end of the half year in 1920 we had retained 91 per cent. and the year before only 83 per cent. of those registered in the fall. This would seem to indicate that the school is attracting and holding pupils. The growth of the school has been, and will probably continue to be, a slow, healthy growth. Next year we must have some assistance in our commercial work as one teacher can no longer do all the teaching. We must either have enlarged accommodations for our

Domestic Arts Department or a larger teaching force and perhaps both. Our Sophomore and Freshmen English classes are so large that they should be divided. Within a very short time it will be necessary to add another teacher to the staff.

Our registration this year was divided as follows: Seniors 19, Juniors 26, Sophomores 37, Freshmen 41. We have 51 boys and 72 girls. The registration by courses shows College Preparatory 22, Commercial 66, Domestic Arts 37, General 24. This totals more than the number registered since several girls are enrolled in both the Domestic Arts and Commercial Departments.

Last June a class of nine was graduated, five boys and four girls. Three of the boys are this year at New Hampshire State College, one at Northeastern College, and one at Dean Academy. Three of the girls are in Keene Normal School and one is employed in Brattleboro, Vermont.

The present year opened with three new teachers—Miss Julia Barron, Miss Rachel Ripley and Mr. John Daniels. All are doing good work. Plans should be made to retain the services of our efficient teachers since frequent changes in the staff seriously handicap the efficiency of the school.

The crowded condition in the building has been relieved very much by the removal of the sixth grade to the portable building. We are using the room formerly occupied by that grade for our commercial work. This department is growing very rapidly and is today one of our most important and efficient branches. New commercial desks have been installed and the room fitted with the Allen translucent shades. This department is now well equipped and doing excellent work. The room formerly used for commercial classes has been fitted up for a recitation room; this helps

greatly to reduce the number of classes in the Alumni Hall and the Teachers' Room, which rooms are not adapted for class work.

The need of a new building is increasing each year. Our Domestic Arts Department is badly handicapped for lack of room and something must be done before next year to give us more kitchen room. This year we have been obliged to divide the seventh grade into three divisions for cooking, and next year our seventh grade will be even larger. The need of Mechanic Arts work for our boys in the seventh and eighth grades is still imperative and cannot be met until we have a new building.

The present building is well adapted for high school use and is large enough for the high school if the grades could be housed elsewhere. A concerted effort should be made this year for the erection of a new building in order that the efficiency of our schools may be increased and the future welfare of Newport and her coming citizens assured.

There have been no changes in the course of study this year except that rhetorical are required of each pupil once a term. In a few years I am sure we shall see the results of this work in the improvement in our public speaking.

In most cases we are receiving the hearty co-operation of the parents but often the parents do not visit the schools, except when some delinquency occurs. If parents would visit the school and become acquainted with the teachers and conditions under which they work we would have much better co-operation and better results.

Many of our pupils are spending too much thought and time out of school hours on music, dancing and other things which are valuable, but should not be stressed at the expense of school work.

Many parents allow their children to remain out of school for a day or half day for slight causes. This seriously interferes with the work of the individual pupil and the school. Every effort should be made to have pupils present, on time, every session throughout the year. Many of our pupils are not spending sufficient time in home study. The arrangement of classes is such that, except for a few pupils, from one to two hours of home study daily is necessary in order that the pupil may do creditable work.

The prizes in the annual Fairbanks Prize Speaking contest were won last year by Miss Madeline Creamer and Sidney Ayers. The school was represented at the El-State Prize Speaking Contest by Miss Mildred Nichols. The contest this year comes in May and we are planning to send a representative.

The Towle prizes were awarded as follows: best essay on American History subject, Raymond Gunn; best essay on any subject, Clifford Eastman; best sight translation in French, Bertha George.

Our athletics this year have taken on a new life due chiefly to the fact that in Sub-Master John H. Daniels we have an excellent coach and an all-around man, one whom the boys respect and work for. Last year I was much discouraged over the athletic situation and the lack of interest in sports, but with the great interest and spirit displayed this year we may look forward to a successful future for our athletics. In football, although we lost to Stevens, the team made an excellent showing, winning five games, tying one, and losing two. We stood second in the Connetcticut Valley League. The prospects for next fall are excellent since we lose by graduation only three men. With the material available we should have good baseball and track teams next spring. Because of local business conditions and the expense of hiring the Town

Hall and travelling it was thought best not to have a school basket ball team. Each class, however, has a girls' team and a boy's team and some very exciting games have been played. The seventh and eighth grades also have boys' and girls' teams. Our games are played in Alumni Hall, which is used by about one hundred and fifty pupils each week for organized play. The remodelling of this hall is one of the greatest improvements ever made in the building.

This fall two shower baths, with hot and cold water, were installed in the boys' basement, filling a long felt want in our athletic work. The heater for the baths also supplies hot water for the Domestic Arts kitchen. The expense of operation is very slight, only about a half a hod of soft coal a day being used.

In conclusion, I wish to thank the school officials and teachers for the fine spirit of co-operation without which no school can be successful.

Respectfully submitted,

JOSEPH A. WIGGIN,
Headmaster.

REPORT OF SCHOOL NURSE

From June, 1920, to December, 1921

To W. H. S. Ellingwood, Superintendent of Schools:

Assisted School Physician in examination of 474 pupils.

Number card notices of physician to parents, 307 pupils.

Number cases found of:

Anaemia,	3
Pulmonary disease,	6
Skin disease,	10
Gland disease,	10
Defective vision,	25
Hypertrophied tonsils,	49
Number advised to come out,	22
Unvaccinated without proper excuse,	49
Curvature of spine,	3
Defective hearing,	5
Tongue tied,	1
Cardiac,	11
Goitre,	5
Pedeculosis,	25
Defective teeth,	215

Number instances of defects remedied since last examination:

Tonsils,	13
Adenoids,	13
Teeth,	27
Vision,	10
Vaccinated,	46

Number instances of treatment secured since last examination,	10
Examined eyes of 474. Have spent 148 $\frac{1}{4}$ hrs. in schools	
Number visits to parents of school children,	243

Visits to parents of school children are to carry home the doctor's advice to the parents of any child who is not perfectly well, explain what the trouble is and what may be done to relieve it. I plan on visiting every school once a week, and sometimes oftener, if possible, to inspect unclean heads, detect sore throats, and to prevent the development and spread of disease. One pupil who had been out of school for a week for illness, was examined the morning she returned, and I found that she was desquamating, she was immediately sent to the school physician, and excluded for having scarlet fever.

Have found a great many children who are underweight and under-nourished; they will be weighed every month and a visit made to their parents to plan the right dietary for them.

Children who have had their vision corrected are better physically and doing better in their school work. I found one child with one eye in a very poor condition, recommended that she be taken to an eye specialist, who found that the muscle in her eye had not developed since she was three years old. Imagine the condition it would have been in five years from now. I am in hopes that all pupils with defective vision will be corrected before next medical inspection.

Five pupils who had a slight defect in vision last year, and had their eyes examined and wore glasses have normal vision this year. If we can only get them when there is a slight error it means only a year or so to wear glasses, but if parents wait too long before

they have them examined, it may mean defective vision the remainder of their lives.

Out of 474 pupils, 215 were found with defective teeth. Far too large a percentage of these children need prompt dental attention. The danger resulting from neglect of defective teeth is infection of tonsils. These children need this dental work in order to safeguard their health. In bringing this report before the parents of the town I earnestly urge that they give this matter of repairing the children's teeth their prompt attention.

I found one child who was examined last year in school. The physician found enlarged tonsils, and recommended to have them removed. The same child was examined this year, tonsils in same condition and the child has cardiac trouble, which may have been caused by infection from bad tonsils. Wouldn't it have been better to have had the tonsils out, than to have the child fight cardiac trouble the rest of his life?

I will be pleased to talk with the parents about their children at any time.

EVA G. LAFOUNTAIN, R. N.

SCHOOL GARDEN REPORT

Mr. W. H. S. Ellingwood, Superintendent of Schools:

The School Gardens were quite successful this year, although not as many pupils were enrolled as last year, the total number being one hundred and thirty-eight.

The principal reason for this being the lack of land. Many of the children live where there is no chance for a garden, others do not feel they can buy fertilizer and hire land.

The largest per cent. of enrollments is in the lower grades, ranging from 32 per cent. to as high as 61 per cent. of the number of pupils in a grade.

We give each child a service flag, pin, and a garden record sheet, and the grade or room which makes the best showing is given a banner.

This year the banner was won by the II and III grade room.

In October we had an exhibit which included canned and dried products and vegetables saved for winter use. The exhibit was excellent and showed what good work the children can do.

We feel that in most cases the children learn more the value of having a garden and enjoy eating what they raise themselves.

The first few weeks of the Domestic Arts work of the VIII grade is devoted to canning and preserving, the materials being brought from home and in some cases done for individuals.

During the year the classes served several meals.

It has occurred to me that if a good sized piece of

land could be procured and made ready for a garden then those pupils who would like a garden and have no facilities for having one, might be assigned a certain portion of this, raise something for themselves and also something for use in the school, in return for the use of the land. In this way we could get our own vegetables for school use in the Domestic Arts classes and furnish some of the material used in making the hot soups which are served at noon to those who bring their lunches, in both Richards' and Primary buildings.

CELIA F. GOVE,

Supervisor of School Gardens.

MANUAL TRAINING REPORT

Mr. W. H. S. Ellingwood, Superintendent of Schools:

The Manual Training department has boys in the VI, VII and VIII grades.

The work in the VI grade has been handicapped this year owing to the shortened time for the regular work the first of the year, but since the Thanksgiving recess we have held the regular classes. In this grade the boys do group work largely, but are given as much freedom of choice in articles made as seems consistent with good work, especial stress being put into the use and handling of tools, learning to read dimensions, squaring boards, etc. The articles made are simple but practical.

In the VII and VIII grades the boys are allowed to choose their own projects so far as their ability allows and the facilities of the equipment permit.

This stimulates the interest and in most cases the boys have something they want to make for themselves or for their homes.

We encourage repair work and have refinished furniture and made new parts to replace broken ones; this branch of work could be utilized much more than at present.

During the year the boys have refinished the desks in three of the rooms in Richards' building.

The projects made in this department cover a large range of subjects; they include toys, Xmas. problems, cupboards, medicine cabinets, taberets, foot stools, magazine racks, book ends, thread holders, sleds, calendar mounts, sewing screens and various other articles.

CELIA F. GOVE,

Teacher of Manual Training.
